

Maharashtra State Board Of Technical Education, Mumbai
Curriculum (Syllabus) for Post S.S.C Diploma Courses

SEMESTER - VI
COMPLETE SYLLABUS (K SCHEME)

Programme Name/s	: Diploma in Electronics & Tele-communication Engg.
Programme Code	: EJ
Semester	: Sixth
Scheme	: K
Duration of Programme	: 6 Semesters
Duration of Semester	: 16 Weeks
NCrF Entry Level	: 4.0
With Effect From	: Academic Year 2023-24
Total Credits / Marks	: 20 Credits / 900 Marks
MSBTE Approval Date	: 04/09/2025

Courses Included

Sr No	Course Code	Course Title	Abbr.	Type
1	315301	MANAGEMENT	MAN	AEC
2	316004	CAPSTONE PROJECT	CPE	INP
3	316332	OPTICAL NETWORK AND SATELLITE COMMUNICATION	ONS	DSC
4	316334	AUTOMATION & PLC (ELECTIVE)	ATP	DSE
5	316337	EMERGING TRENDS IN ELECTRONICS	ETE	DSC
6	316338	COMPUTER NETWORK & DATA COMMUNICATION	CND	DSC

I. CONTENTS

Sr No	Course Code	Course Title	Page No.
-	-	Title Page	1
-	-	Contents and Course Summary	2
-	-	Subject-wise Syllabus Index	3 - 5
-	-	LEARNING AND ASSESSMENT SCHEME (TEACHING SCHEME)	6
1	315301	MANAGEMENT	7 - 13
2	316004	CAPSTONE PROJECT	14 - 23
3	316332	OPTICAL NETWORK AND SATELLITE COMMUNICATION	24 - 33
4	316334	AUTOMATION & PLC	34 - 42
5	316337	EMERGING TRENDS IN ELECTRONICS	43 - 50
6	316338	COMPUTER NETWORK & DATA COMMUNICATION	51 - 59

II. COURSE SUMMARY

Course Code	Course Title	Type	Credits	CL / TL / LL / SL (Hrs/Week)	Theory Paper	Assessment	Total Marks
315301	Management	AEC	2	3 / - / - / 1	1.5 Hrs (Online)	Theory 100 (30+70 Online), SLA 25	125
316004	Capstone Project	INP	2	- / - / 2 / 2	No theory paper	FA-PR 50, SA-PR 50 (Ext.), SLA 50	150
316332	Optical Network and Satellite Communication	DSC	5	4 / - / 4 / 2	3 Hrs	Theory 100 (30+70), FA-PR 25, SA-PR 25 (Ext.), SLA 25	175
316334	Automation & PLC	DSE	4	4 / - / 2 / 2	3 Hrs	Theory 100 (30+70), FA-PR 25, SA-PR 25 (Ext.), SLA 25	175
316337	Emerging Trends in Electronics	DSC	2	3 / - / - / 1	1.5 Hrs (Online)	Theory 100 (30+70 Online), SLA 25	125
316338	Computer Network & Data Communication	DSC	5	4 / - / 4 / 2	3 Hrs	Theory 100 (30+70), FA-PR 25, SLA 25	150
	Total		20	18 / - / 12 / 10			900

Abbreviations : CL - Classroom Learning, TL - Tutorial Learning, LL - Laboratory Learning, SL - Self Learning, FA - Formative Assessment, SA - Summative Assessment, PR - Practical, SLA - Self Learning Assessment, AEC - Ability Enhancement Course, DSC - Discipline Specific Course Core, SEC - Skill Enhancement Course, VEC - Value Education Course.

Note : 1 credit is equivalent to 30 notional hours. If a candidate does not secure minimum passing marks in FA-PR of any course, the candidate shall be declared "Detained" in that semester. **Elective (any one):** 316334 Automation & PLC, 316335 Drone Technology, 316340 VLSI Applications, 316374 Solar Technology and Maintenance. This book includes 316334 (Automation & PLC); credits and marks above count one elective.

III. SUBJECT-WISE SYLLABUS INDEX

Each table shows where every part of the curriculum, including each theory unit, begins in this book.

1. MANAGEMENT (Course Code : 315301)	Pages 7 - 13
Contents	Page No.
Rationale & Industry Outcome	7
Course Outcomes (COs)	7
Teaching-Learning & Assessment Scheme	8
Theory Learning Outcomes & Content	8
Unit - I : Introduction to Management	9
Unit - II : Product, Operations and Project Management	9
Unit - III : Management Practices	10
Unit - IV : Marketing Management	10
Unit - V : Supply Chain & Human Resource Management	10
Laboratory / Practical Experiences	11
Micro Project / Assignment / Self Learning	11
Laboratory Equipment / Tools	12
Specification Table (Weightage)	12
Assessment Methodologies	12
CO-PO Matrix	12
Suggested Books / Learning Materials	12
Learning Websites & Portals	13

2. CAPSTONE PROJECT (Course Code : 316004)	Pages 14 - 23
Contents	Page No.
Rationale & Industry Outcome	14
Course Outcomes (COs)	14
Teaching-Learning & Assessment Scheme	15
General Guidelines for Project Work	15
Project Facilitation Guidelines	15
Criteria of Assessment / Evaluation of Project Work	16
CO-PO Mapping	18
Typographical Guidelines for Project Report	18
Project Report	18

3. OPTICAL NETWORK AND SATELLITE COMMUNICATION (Course Code : 316332)	Pages 24 - 33
Contents	Page No.
Rationale & Industry Outcome	24
Course Outcomes (COs)	24
Teaching-Learning & Assessment Scheme	24
Theory Learning Outcomes & Content	25
Unit - I : Basics of Optical Fiber Communication	25
Unit - II : Optical Communication Systems	26
Unit - III : Characteristics of Optical Fiber	26
Unit - IV : Overview of Satellite Systems	27
Unit - V : Satellite Space Segment and Space Link	27
Laboratory / Practical Experiences	27
Micro Project / Assignment / Self Learning	29
Laboratory Equipment / Tools	30
Specification Table (Weightage)	31
Assessment Methodologies	31
CO-PO Matrix	31
Suggested Books / Learning Materials	32
Learning Websites & Portals	32

4. AUTOMATION & PLC (Course Code : 316334)	Pages 34 - 42
Contents	Page No.
Rationale & Industry Outcome	34
Course Outcomes (COs)	34
Teaching-Learning & Assessment Scheme	34
Theory Learning Outcomes & Content	35
Unit - I : Basics of Automation	35
Unit - II : PLC Fundamentals and Interfacing	36
Unit - III : Basic PLC Programming	36
Unit - IV : Advanced PLC Programming	37
Unit - V : Basics of Communication Protocols, SCADA and Advancements in Automation	37
Laboratory / Practical Experiences	37
Micro Project / Assignment / Self Learning	38
Laboratory Equipment / Tools	39
Specification Table (Weightage)	40
Assessment Methodologies	40
CO-PO Matrix	40
Suggested Books / Learning Materials	41
Learning Websites & Portals	41

5. EMERGING TRENDS IN ELECTRONICS (Course Code : 316337)	Pages 43 - 50
Contents	Page No.
Rationale & Industry Outcome	43
Course Outcomes (COs)	43
Teaching-Learning & Assessment Scheme	43
Theory Learning Outcomes & Content	44
Unit - I : Advanced Processors and Technology	44
Unit - II : Smart Manufacturing Processes and Tools	45
Unit - III : Next Generation Telecom Network	46
Unit - IV : IIoT and Immersive Technologies	46
Unit - V : Drone Systems and Applications	47
Laboratory / Practical Experiences	47
Micro Project / Assignment / Self Learning	47
Laboratory Equipment / Tools	48
Specification Table (Weightage)	48
Assessment Methodologies	48
CO-PO Matrix	48
Suggested Books / Learning Materials	49
Learning Websites & Portals	49

6. COMPUTER NETWORK & DATA COMMUNICATION (Course Code : 316338)	Pages 51 - 59
Contents	Page No.
Rationale & Industry Outcome	51
Course Outcomes (COs)	51
Teaching-Learning & Assessment Scheme	51
Theory Learning Outcomes & Content	52
Unit - I : Fundamentals of Data Communication and Computer Network	52
Unit - II : Network Models and Physical Layer	53
Unit - III : Data Link Layer	53
Unit - IV : Network Layer and Transport Layer	54
Unit - V : Application Layer	54
Laboratory / Practical Experiences	54
Micro Project / Assignment / Self Learning	56
Laboratory Equipment / Tools	57
Specification Table (Weightage)	57
Assessment Methodologies	57
CO-PO Matrix	58
Suggested Books / Learning Materials	58
Learning Websites & Portals	58

Maharashtra State Board Of Technical Education, Mumbai																										
Learning and Assessment Scheme for Post S.S.C Diploma Courses																										
Programme Name		: Diploma In Electronics & Tele-communication Engg.										With Effect From Academic Year 2023-24														
Programme Code		: EJ										Duration : 16 WEEKS														
Duration Of Programme		: 6 Semester										Scheme : K														
Semester		: Sixth										NCRF Entry Level : 4.0														

Abbreviations : CL- Classroom Learning , TL- Tutorial Learning, LL-Laboratory Learning, FA - Formative Assessment, SA -Summative Assessment, IKS - Indian Knowledge System, SLA - Self Learning Assessment

Legends : @ Internal Assessment, # External Assessment, *# On Line Examination , @\$ Internal Online Examination

Note :

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
 2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
 3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
 4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.* 15 Weeks
 5. 1 credit is equivalent to 30 Notional hrs.
 6. * Self learning hours shall not be reflected in the Time Table.
 7. * Self learning includes micro project / assignment / other activities.
- Course Category :** Discipline Specific Course Core (DSC) , Discipline Specific Elective (DSE) , Value Education Course (VEC) , Intern./Apprenti./Project./Community (INP) , Ability Enhancement Course (AEC) , Skill Enhancement Course (SEC) , Generic Elective (GE)

Programme Code	
Semester	: Fifth / Sixth
Course Title	: MANAGEMENT
Course Code	: 315301

I. RATIONALE

Effective management is the cornerstone of success for both organizations and individuals. It empowers diploma engineers/ professionals to accomplish their tasks with finesse and efficiency through strategic planning and thoughtful execution, projects can optimize finances, enhance safety measures, facilitate sound decision-making, foster team collaboration and cultivate a harmonious work environment. The diploma engineers require leadership and management skills with technical knowledge of the core field to carry out various tasks smoothly. This course aims to instill fundamental management techniques, empowering diploma engineers/ professionals to enhance their effectiveness in the workplace.

II. INDUSTRY / EMPLOYER EXPECTED OUTCOME

The aim of this course is to help the students to attain the following industry identified outcome through various teaching learning experiences: Apply the relevant managerial skills for achieving optimal results at workplace.

III. COURSE LEVEL LEARNING OUTCOMES (COS)

Students will be able to achieve & demonstrate the following COs on completion of course based learning

- CO1 - Use relevant management skills to handle work situation

- CO2 - Apply appropriate techniques of product, operations and project management
- CO3 - Use comprehensive tools of recent management practices
- CO4 - Plan suitable marketing strategy for a product / service
- CO5 - Utilize supply chain and human resource management techniques for effective management

IV. TEACHING-LEARNING & ASSESSMENT SCHEME

Course Code	Course Title	Abbr	Course Category/s	Learning Scheme					Credits	Assessment Scheme											Total Marks	
				Actual Contact Hrs./Week			SLH	NLH		Paper Duration	Theory				Based on LL & TL				Based on SL			
															Practical							
				CL	TL	LL					FA-TH	SA-TH	Total		FA-PR		SA-PR		SLA			
							Max	Min		Max					Min	Max	Min	Max	Min			
315301	MANAGEMENT	MAN	AEC	3	-	-	1	4	2	1.5	30	70*#	100	40	-	-	-	-	25	10	125	

Total IKS Hrs for Sem. : 1 Hrs

Abbreviations: CL- ClassRoom Learning , TL- Tutorial Learning, LL-Laboratory Learning, SLH-Self Learning Hours, NLH-Notional Learning Hours, FA - Formative Assessment, SA -Summative assessment, IKS - Indian Knowledge System, SLA - Self Learning Assessment

Legends: @ Internal Assessment, # External Assessment, *# On Line Examination , @\$ Internal Online Examination

Note :

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.* 15 Weeks
5. 1 credit is equivalent to 30 Notional hrs.
6. * Self learning hours shall not be reflected in the Time Table.
7. * Self learning includes micro project / assignment / other activities.

V. THEORY LEARNING OUTCOMES AND ALIGNED COURSE CONTENT

Sr.No	Theory Learning Outcomes (TLO's) aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.
-------	---	---	--------------------------------

Sr.No	Theory Learning Outcomes (TLO's) aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.
1	TLO 1.1 Justify the importance of management thoughts in Indian knowledge system. TLO 1.2 Describe the importance of management in day to day life. TLO 1.3 Explain Henry Fayol's principles of management. TLO 1.4 Describe the role of each level of management in its management hierarchy. TLO 1.5 Practice the self management skills for a given situation TLO 1.6 Apply the required managerial skills for a given situation	Unit - I Introduction to Management 1.1 Evolution of management thoughts from ancient/medieval to modern times in India (IKS) 1.2 Management: meaning, importance, characteristics, functions & challenges. 1.3 Introduction to scientific management- Taylor's & Fayol's principles of management 1.4 Levels & functions of management at supervisory level. 1.5 Self management skills: Self awareness, self discipline, self motivation, goal setting, time management, decision making, stress management, work life balance and multitasking 1.6 Overview of Managerial Skills: negotiation skills, team management, conflict resolution, feedback, leadership	Presentations Case Study Interactive session Quiz competition Mixed Picture Puzzle
2	TLO 2.1 Identify the appropriate creativity technique for new product development TLO 2.2 Describe the new product development process for a product / service TLO 2.3 Comprehend the importance of various strategic steps Product Management TLO 2.4 Elaborate Agile product management TLO 2.5 Explain the significance of the Project Management TLO 2.6 Describe the various tools of project management	Unit - II Product, Operations and Project Management 2.1 Creativity and innovation management: creativity techniques - brainstorming, checklist, reverse brainstorming, morphological analysis, six thinking hats. 2.2 New product development, change management 2.3 Product Management -meaning, strategic steps for sustainable design of a product 2.4 Agile product management- concept, benefits, principles and manifesto 2.5 Project Management: importance, areas within project management, 4Ps and phases 2.6 Tools of Project Management: PERT and CPM, GANTT & Chart Overview of Estimate and Budget	Presentations Case Study Video Demonstrations Presentations Role Play

Sr.No	Theory Learning Outcomes (TLO's) aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.
3	TLO 3.1 Understand the importance of quality management tools TLO 3.2 Explain the importance of various techniques for optimization and waste minimization TLO 3.3 State the importance of ISO quality standards TLO 3.4 Describe ERP TLO 3.5 State the importance of ISO TLO 3.6 Recognize the importance of customer satisfaction as a competitive advantage	Unit - III Management Practices 3.1 Quality circle, kaizen, Six Sigma, TQM 3.2 5S, Kanban card system, TPM, Lean Manufacturing: Meaning, Steps and Importance 3.3 Quality Standards and ISO: Meaning, ISO 9001:2016, ISO 14000, OSHA 2020 3.4 The overview of ERP along with example 3.5 Service quality and customer/client satisfaction, servicescape	Presentation Case study Interactive session Quiz Video Demonstration Lecture Using Chalk-Board
4	TLO 4.1 Explain the importance of marketing techniques TLO 4.2 Explain the importance of needs, wants and desires in marketing TLO 4.3 Interpret the traditional and digital marketing techniques TLO 4.4 Plan different aspects of an event management	Unit - IV Marketing Management 4.1 Marketing management: meaning, significance, Seven P's of Marketing 4.2 Needs, wants and demands in marketing. Customer relationship management 4.3 Types of marketing: traditional and digital marketing 4.4 Event management: types, different aspects of event management, crisis management	Case Study Interactive session based video Role Play Flipped Classroom Presentations
5	TLO 5.1 State the importance of supply chain and logistics management TLO 5.2 Explain the components of supply chain and logistics Management TLO 5.3 Describe the role of information technology in supply chain & logistics management TLO 5.4 State the significance of Human Resource Management TLO 5.5 Analyze the various methods of recruitment, selection and training for an organization TLO 5.6 List the qualities of a successful supervisor	Unit - V Supply Chain & Human Resource Management 5.1 The overview of Supply Chain and logistics Management 5.2 Components of Supply Chain and logistics Management 5.3 Role of information technology in supply chain & logistics management 5.4 Overview of Human Resource Management-Meaning,significance,scope and principles 5.5 Recruitment, selection and training of human resources. Chalk Circle 5.6 Qualities of a successful supervisor /team leader and types of leadership	Presentations Video Demonstrations Case Study Collaborative learning Video Demonstrations Chalk-Board

VI. LABORATORY LEARNING OUTCOME AND ALIGNED PRACTICAL / TUTORIAL EXPERIENCES : NOT APPLICABLE.**VII. SUGGESTED MICRO PROJECT / ASSIGNMENT/ ACTIVITIES FOR SPECIFIC LEARNING / SKILLS DEVELOPMENT (SELF LEARNING)****Assignment / Article**

- Make a one page note based on a book of management you read.
- Write a short article on inventory management exploring online learning resources.
- Prepare a report on ISO standards applicable to your field. a. IATF 16949-2016 / SLA-TS 16949-2016, - Automotive Industry b. ISO 22000 — Food safety management c. ISO 50001 — Energy management d. ISO/IEC 27001 - Cyber Security e. ISO/DIS 4931-1 - Buildings and civil engineering works
- Prepare a 4 quadrant matrix of time management for managing the tasks.
- Prepare a report on any one software used for Supply Chain and Logistics Management.
- Prepare a GANTT Chart for project management related to your field.

Note Taking

- Watch a Tedx Talk Video on managerial skills and take notes in the form of keywords.

Case Study

- Prepare a case study and discuss the same on following topics a. Self Management Skills b. Six Thinking Hats c. Kaizen d. Quality Circle e. Safety Measures in different organizations related to your field
- Study the recruitment and selection process of any organization related to your field.
- Prepare a case study on management lessons based on life of Chhatrapati Shivaji Maharaj
- Conduct outbound training on managerial skills. Make a video and upload on social media.

Quizes

- Participate in online quizzes related to areas of management .

Assignment

- Workshops to be conducted for students on following topics a. creativity techniques b. time management c. stress management d. negotiation and conflict e. goal setting f. meditation new product development

Note :

- Above is just a suggestive list of microprojects and assignments; faculty must prepare their own bank of microprojects, assignments, and activities in a similar way.
- The faculty must allocate judicious mix of tasks, considering the weaknesses and / strengths of the student in acquiring the desired skills.
- If a microproject is assigned, it is expected to be completed as a group activity.
- SLA marks shall be awarded as per the continuous assessment record.
- For courses with no SLA component the list of suggestive microprojects / assignments/ activities are optional, faculty may encourage students to perform these tasks for enhanced learning experiences.
- If the course does not have associated SLA component, above suggestive listings is applicable to Tutorials and may be considered for FA-PR evaluations.

VIII. LABORATORY EQUIPMENT / INSTRUMENTS / TOOLS / SOFTWARE REQUIRED : NOT APPLICABLE**IX. SUGGESTED WEIGHTAGE TO LEARNING EFFORTS & ASSESSMENT PURPOSE (Specification Table)**

Sr.No	Unit	Unit Title	Aligned COs	Learning Hours	R-Level	U-Level	A-Level	Total Marks
1	I	Introduction to Management	CO1	13	8	6	4	18
2	II	Product, Operations and Project Management	CO2	8	2	4	6	12
3	III	Management Practices	CO3	8	4	4	6	14
4	IV	Marketing Management	CO4	8	2	4	6	12
5	V	Supply Chain & Human Resource Management	CO5	8	4	4	6	14
Grand Total				45	20	22	28	70

X. ASSESSMENT METHODOLOGIES/TOOLS**Formative assessment (Assessment for Learning)**

- MCQ Based Class Test, Self Learning Activities / Assignment

Summative Assessment (Assessment of Learning)

- Summative Assessment (Assessment of Learning) MCQ based

XI. SUGGESTED COS - POS MATRIX FORM

Course Outcomes (COs)	Programme Outcomes (POs)							Programme Specific Outcomes* (PSOs)		
	PO-1 Basic and Discipline Specific Knowledge	PO-2 Problem Analysis	PO-3 Design/ Development of Solutions	PO-4 Engineering Tools	PO-5 Engineering Practices for Society, Sustainability and Environment	PO-6 Project Management	PO-7 Life Long Learning	PSO-1	PSO-2	PSO-3
CO1	1	1	1	-	-	2	3			
CO2	1	3	3	-	1	3	3			
CO3	1	3	1	-	1	1	3			
CO4	1	2	2	-	1	2	3			
CO5	1	1	2	-	1	2	3			

Legends :- High:03, Medium:02,Low:01, No Mapping: -

*PSOs are to be formulated at institute level

XII. SUGGESTED LEARNING MATERIALS / BOOKS

Sr.No	Author	Title	Publisher with ISBN Number
1	A. K. Gupta	Engineering Management	S. Chand, ISBN: 81-219-2812-5, 2007, 2nd Edition

Semester	: Sixth
Course Title	: CAPSTONE PROJECT
Course Code	: 316004

I. RATIONALE

Capstone projects in engineering study are considered important as it allow students to integrate and apply the knowledge and skills acquired throughout their academic program and effectively demonstrating their learning of programme by tackling a real-world problem, ultimately keeping them well prepared for the job market. The capstone project is usually the final assignment and plays a vital role in preparing students for the world of work to its practical applications and ability to help hone students' professional knowledge and skills. Normally, capstone projects are developed in collaboration with industries or businesses, providing students with valuable insights. Capstone projects has been considered as an integral part of diploma curriculum. It helps learners to perform and demonstrate skills gained due to early courses of Diploma study independent. Therefore, this is considered as a course of final year/semester study.

II. INDUSTRY / EMPLOYER EXPECTED OUTCOME

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

- Apply professional skills for solving , executing and demonstrating solutions to real-world problems

III. COURSE LEVEL LEARNING OUTCOMES (COS)

Students will be able to achieve & demonstrate the following COs on completion of course based learning

- CO1 - Elaborate the identified field problem from the perspective of project work at institute.
- CO2 - Conduct feasibility & viability analysis (using data collection, experiments, Simulation , Coding) to validate required resources, cost, support of the project work.
- CO3 - Apply the acquired knowledge and skills in providing solutions to the real field/industrial problems.
- CO4 - Present Project and its output/ findings / achievements alongwith its exhibits.

IV. TEACHING-LEARNING & ASSESSMENT SCHEME

Course Code	Course Title	Abbr	Course Category/s	Learning Scheme					Credits	Assessment Scheme												Total Marks
				Actual Contact Hrs./Week			SLH	NLH		Paper Duration	Theory				Based on LL & TL				Based on SL			
															Practical							
				CL	TL	LL	FA-TH				SA-TH		Total		FA-PR		SA-PR		SLA			
Max	Max	Max	Min	Max	Min	Max	Min	Max	Min	Max	Min											
316004	CAPSTONE PROJECT	CPE	INP	-	-	2	2	4	2	-	-	-	-	-	50	20	50#	20	50	20	150	

V. General guidelines for PROJECT WORK

- The Project- problems must be related to the programme or may be interdisciplinary, based on the industry expected outcomes.
- The individual students have different aptitudes and strengths. Project work, therefore, should match the strengths of students. For this purpose, students should be asked to identify the type of project work they would like to execute.
- Project titles are to be finalized in co-ordination/consultation with the Faculty mentor. However, faculty may form a team of students as per specific roles- Literature survey/data collection, data Analysts, model/prototype developers, testers, Project managers using IoTs ITES and software /application development. Study type project is NOT advisable.
- Project must be assigned to a group of 3-4 students under the guidance of identified faculty mentor.
- Students are required to prepare a prototype/working model/software of the Project and simultaneously prepare a report.
- Students shall Submit One Hard copy and one Soft copy each of Project Report and soft-copy of the project code or the working model.
- Students must maintain a project execution diary having the progress steps and details. The concerned faculty should check the diary on a weekly basis and accordingly interact with students based on the progress shown and keep proper record with feedback if any.
- Project shall address National Thrust area such as Environment, Digitization, Automation, sustainability and similar domains.
- Student shall try to use the national and international standards wherever possible (processes / materials / equipments etc ..)

VI. Project facilitation guidelines:

Once the Project statement has been finalized and allotted to the students, the Faculty Mentor role is very important as guide, motivator, catalyser to promote learning and sustain the interest of the students. At the same time the Faculty Mentor is not expected to guide the students on each step, otherwise it will curb the creativity of the students-group. The Faculty Mentor has to work as a mentor. Following should be kept in mind while facilitating the project at the institute:

1.Project orientation cum -briefing: the project should be relevant to the curriculum of the programme. The project shall be cost effective taking safety aspects, ethical issues, environmental issues and confidentiality as per expectation of industry(if any) into consideration, The work may be industry Sponsored.

2.Information search and data collection: the information and data should be realistic and relevant to the problem /project. Hypothetical data is not to be taken into consideration.

3.Implementation and Monitoring: The project must have important steps /milestones to achieve as per the time frame/action plan prepared by students and faculty. The monitoring mechanism such as daily/weekly dairy (**Format given below**) must be clearly explained and delineated for the students.

VII.Criteria of Assessment /Evaluation of Project work

A. Formative Assessment (FA) criteria

The **Formative Assessment (FA)** of the students for 50 marks is to be done based on following criteria.

Appropriate RUBRICS may be used for assessment

Rubrics for Assessment of the team

Sr.No.	Criteria	Marks
1	Project Selection & Problem definition	05
2	Literature survey and data collection/ Gathering	05
3	Design / concept of project/ Working - Execution of Project	10
4	Stage wise progress as per Action plan/milestone	05
5	Quality Report Writing	05

Rubrics for Individual Assessment

Sr.No.	Criteria	Marks
1	Contribution as a team member	05
2	Depth of Knowledge	10
3	Presentation	05

B. Summative Assessment Criteria

- The summative assessment for 50 marks is to be done and based on following criteria. This assessment shall be done by the faculty mentor and External examiner.

Sr.No.	Criteria	Marks
1	Capstone Project Completion as per plan	10
2	Project related Requirement Analysis & Designing	10
3	Developing a Solution with proper justifications, Teamwork	10
4	Project Report Writing	10
5	Project Presentation	10

(**NOTE :** Team based and Individual performance based summative assessment may include Innovativeness , Technology used , user friendliness , cost effectiveness , society benefits etc..)

SUGGESTED RUBRIC FOR SUMMATIVE ASSESSMENT OF CAPSTONE PROJECT

PROJECT ASSESSMENT

Project Title:

Project Assessment Rubric

Performance	Excellent	Good	Fair	Poor
Criteria	9-10 marks.	6-8 marks.	4-5 marks.	0-3 marks
Capstone Project Completion	Excellent	Good	Fair	Poor
	The project is completed as per tasks described in synopsis.	The project is completed but require minor modifications.	The project is completed but require several modifications.	The project is not completed as per tasks described in synopsis.
Project related Requirement Analysis & Designing	9-10 marks.	6-8 marks.	4-5 marks.	0-3 marks
	Effectively contributed in requirement analysis and designing.	Partially Contributed in requirement analysis and designing.	Attempted to contribute in requirement analysis and designing	No contribution in requirement analysis and designing.
Developing a Solution with proper justifications , Teamwork	9-10 marks.	6-8 marks.	4-5 marks.	0-3 marks
	Developed the critical solution modules with Innovation, optimized design and worked very well with the team.	Developed some solutions with higher complexity and worked well with the team.	Attempted to develop few solutions and worked with the team.	No contribution in developing a solution and in the team.
Project Report Writing	9-10 marks.	6-8 marks.	4-5 marks.	0-3 marks
	Worked very well to submit an excellent project report .	Worked well to submit the project report with covering all the aspects of a standard report.	Tried to submit the project report but standard of report was not satisfactory.	No contribution in project report writing.
Project Presentation	9-10 marks.	6-8 marks.	4-5 marks.	0-3 marks
	Presented the project work flawlessly.	Presented the project work very nice.	Presented the project work not so well.	Presentation skill is not up to the mark.

Comments (if any)

NOTE : “ These are suggestive rubrics Faculty mentor and external examiner may frame different rubrics as per Programme need and assigned Project work “

C. Self Learning Assessment**Self Learning Assessment****Max Marks -50**

Sr.No.	Criteria	Max Marks	Marks Obtained
1	Project Selection & Problem definition	10	
2	Literature survey and data collection/ Gathering	05	
3	Design / concept of project/ Working - Execution of Project	15	
4	Stage wise progress as per Action plan/milestone/ psychomotor motor skills acquired	10	
5	Quality Report Writing	10	

VIII. CO-PO Mapping

CO-PO mapping will vary project wise and shall be prepared by concerned faculty for the given project

IX. Typographical instructions/guidelines for Project report writing

Following is the suggestive format for preparing the Project report. Actual report may differ slightly depending upon the nature of industry. The training report may contain the following.

- The PROJECT report shall be computer typed (English- British) and printed on A4 size paper.
- Text Font -Times New Roman (TNR), Size-12 point
- Subsection heading TNR- 12 point bold normal
- Section heading TNR- 12 capital bold
- Chapter Name/ Topic Name – TNR- 14 Capital
- All text should be justified. (Settings in the Paragraph)
- The report must be typed on one side only with double space with a margin 3.5 cm on the left, 2.5 cm on the top, and 1.25 cm on the right and at bottom.
- The training report must be hardbound/ Spiralbound with cover page in black colour. The name of the candidate, diploma (department), year of submission, name of the institute shall be printed on the cover [Refer sample sheet (outer cover)]
- The training report, the title page [Refer sample sheet (inner cover)] should be given first then the Certificate followed by the acknowledgment and then contents with page numbers.

X. Project Report

On completion of the project work, every student will submit a project report which should contain the following:

- Cover Page (as per annexure 1)
- Title page (as per annexure 2)
- Certificate by the Guide (as per annexure 3)
- Acknowledgment (The candidate may thank all those who helped in the execution of the project.)
- Abstract (It should be in one page and include the purpose of the study; the methodology used.)

6. Table of Contents (as per general guidelines): Detailed description of the project (This should be split in various chapters/sections with each chapter/section describing a project activity in totality).

Chapter–1 Introduction (background of the Industry or User based Problem/Task)

Chapter–2 Literature Survey (to finalize and define the Problem Statement)

Chapter–3 Scope of the project

Chapter–4 Methodology/Approach, if any

Chapter–5 Details of designs, working and processes

Chapter–6 Results and Applications

7. Conclusion

8. References (The listing of references should be typed 2 spaces below the heading “REFERENCES” in alphabetical order in single spacing left – justified. It should be numbered consecutively (in square [] brackets, throughout the text and should be collected together in the reference list at the end of the report. The references should be numbered in the order they are used in the text. The name of the author/authors should be immediately followed by the year and other details). Typical examples of the references are given below:

NOTE:

1. Project report must contain only a relevant and short mention – technology or platform or tools used. It must be more focussed on project work and its implementation
2. Students can add/remove/edit chapter names as per the discussion with their guide

Date and Time		

Programme Name/s	: Digital Electronics/ Electronics & Tele-communication Engg./ Electrical and Electronics Engineering/ Electronics & Communication Engg./ Electronics Engineering/ Industrial Electronics/ Electronics & Computer Engg.
Programme Code	: DE/ EJ/ EK/ ET/ EX/ IE/ TE
Semester	: Sixth
Course Title	: OPTICAL NETWORK AND SATELLITE COMMUNICATION
Course Code	: 316332

I. RATIONALE

Optical networks and satellite communication are the backbone of all high speed communications. The optical networking and satellite communication course is crucial for driving innovative technologies across multiple sectors. This course has been designed to empower diploma engineering students to maintain fiber optics and satellite communication systems.

II. INDUSTRY / EMPLOYER EXPECTED OUTCOME

The aim of this course is to attend the following industry/employer expected outcome through various teaching learning experiences.

Maintain optical and satellite communication systems.

III. COURSE LEVEL LEARNING OUTCOMES (COS)

Students will be able to achieve & demonstrate the following COs on completion of course based learning

- CO1 - Interpret the functions of the various units of optical fiber communication system.
- CO2 - Evaluate the performance characteristics of optical sources and detectors.
- CO3 - Establish analog and digital fiber optic link.
- CO4 - Analyze various parameters influencing performance of transmitted and received signals in satellite communication systems.
- CO5 - Maintain Satellite earth segment.

IV. TEACHING-LEARNING & ASSESSMENT SCHEME

Course Code	Course Title	Abbr	Course Category/s	Learning Scheme					Credits	Assessment Scheme												Total Marks	
				Actual Contact Hrs./Week	SLHNLH			Paper Duration		Theory				Based on LL & TL				Based on SL

Total IKS Hrs for Sem. : 0 Hrs

Abbreviations: CL- ClassRoom Learning , TL- Tutorial Learning, LL-Laboratory Learning, SLH-Self Learning Hours, NLH-Notional Learning Hours, FA - Formative Assessment, SA -Summative assessment, IKS - Indian Knowledge System, SLA - Self Learning Assessment

Legends: @ Internal Assessment, # External Assessment, *# On Line Examination , @\$ Internal Online Examination
Note :

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.* 15 Weeks
5. 1 credit is equivalent to 30 Notional hrs.
6. * Self learning hours shall not be reflected in the Time Table.
7. * Self learning includes micro project / assignment / other activities.

V. THEORY LEARNING OUTCOMES AND ALIGNED COURSE CONTENT

Sr.No	Theory Learning Outcomes (TLO's) aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.
1	TLO 1.1 Interpret the Electromagnetic Magnetic Spectrum and spot the optical bands used for optical fiber communication. TLO 1.2 Describe the functions of each block in fiber optic communication system. TLO 1.3 Define the given basic optic terms. TLO 1.4 Classify the optical fiber cables based on modes of propagation of light and index profile TLO 1.5 Describe fiber joints, fiber connectors and splices. TLO 1.6 Describe step by step splicing procedure.	Unit - I Basics of Optical fiber communication 1.1 Electromagnetic spectrum, optical bands and optical windows, need for optical fiber communication. 1.2 Construction, advantages ,disadvantages and applications of fiber optic cable ,block diagram of optical fiber communication system. 1.3 Definition-Reflection, Refraction, Total Internal Reflection (TIR),Snell's law, Critical angle, Numerical Aperture (NA) , Acceptance angle and Acceptance cone , Light propagation in optical fiber–(Numerical on above concepts) 1.4 Classification of optical fibers-based on modes of propagation of light and index profile, Propagation modes- single mode, multi mode ,mode-field diameter in single-mode optical fiber (SMF) 1.5 Fiber joints, fiber connectors, splices 1.6 Splicing Techniques-Fusion splice,V-groove splice and elastic tube splice	Presentations Video Demonstrations Lecture Using Chalk-Board

Sr.No	Theory Learning Outcomes (TLO's) aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.
2	TLO 2.1 Describe working principle and characteristics of given optical source. TLO 2.2 Describe the working principle and characteristics of the given optical detector. TLO 2.3 Explain the coherent detection technique used in optical receivers. TLO 2.4 Describe the working of the given optical network component. TLO 2.5 Compare the working of optical amplifiers.	Unit - II Optical Communication Systems 2.1 Working principle and characteristics of sources: Edge emitting Light Emitting Diode, Edge emitting Light Amplification by Stimulated Emission of Radiation 2.2 Working principle and characteristics of detectors : PIN photodiode , Avalanche photo diode, Comparison of PIN photodiode and Avalanche photo diode 2.3 Eye diagram, BER ,Q -Factor and Coherent detection in optical receivers 2.4 Couplers, isolators, circulators, Optical routers 2.5 Basic applications and types of optical amplifiers: Erbium -Doped Fiber Amplifiers, Raman Amplifiers, features of Optical network Ethernet standards : IEEE 802.3j,802.3y,802.3z	Lecture Using Chalk-Board Presentations
3	TLO 3.1 Explain dispersion in optical fibers. TLO 3.2 Describe dispersion management and compensation techniques for improved transmission. TLO 3.3 Illustrate the effect of pulse spreading on signal transmission. TLO 3.4 Describe the transmission losses in the optical fiber cable. TLO 3.5 Describe the steps to measure optical parameters using OTDR. No Numerical.	Unit - III Characteristics of Optical Fiber 3.1 Dispersion in Optical fiber, types of dispersion 3.2 Dispersion compensation techniques , dispersion measurements - Chromatic Dispersion, Group Velocity Dispersion, Dispersion Slope, Polarization Mode Dispersion 3.3 Pulse spreading and its impact on signal transmission 3.4 Transmission losses in the optical fiber- Insertion loss, Return loss, dispersion loss, coupling loss, attenuation loss, absorption losses, radiation losses and linear scattering losses 3.5 Link power budget, Optical Time Domain Reflectometer (OTDR)-Working Principle.	Lecture Using Chalk-Board Demonstration Presentations

Sr.No	Theory Learning Outcomes (TLO's) aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.
4	TLO 4.1 Describe the types of satellites and their respective functions. TLO 4.2 Explain the phenomenon of limits of visibility and Sun Transit Outage. TLO 4.3 Define the given key satellite communication terms- (latitude, longitude, look angle, elevation angle, station keeping, propagation delay, velocity, and footprint). TLO 4.4 Describe Kepler's law of satellite motion.	Unit - IV Overview of Satellite Systems 4.1 Block diagram of Satellite Communication system, Earth segment, Different types of satellites-Active, Passive, geostationary and geosynchronous, Frequency allocation for satellite services-uplink and downlink frequency, Satellite frequency bands 4.2 Different satellite orbits-Low Earth Orbit (LEO), Medium Earth Orbit (MEO), Elliptical Orbit, Geostationary Earth Orbit (GEO) and their comparison, limits of visibility and Sun Transit Outage. 4.3 Basic terminologies used in satellite communication- latitude, longitude, look angle, elevation angle, station keeping, propagation delay time, velocity and footprint (numerical on Look Angle) 4.4 Kepler's law of satellite motion (three laws), apogee and perigee heights, orbital perturbations, effects of a nonspherical earth shape, atmospheric drag, effect of eclipse on satellite motion.	Lecture Using Chalk-Board Video Demonstrations Flipped Classroom Presentations Hands-on Case Study Site/Industry Visit
5	TLO 5.1 Explain the roles and operations of the subsystem in the satellite earth station. TLO 5.2 Describe various satellite link transmission losses. TLO 5.3 Compute different parameters related to satellite communication using the link power budget analysis. TLO 5.4 Describe the working of the VSAT with the help of a suitable block diagram.	Unit - V Satellite space segment and space link 5.1 Block Diagram of Satellite Earth Station, Antenna subsystem, Low Noise Amplifier (LNA), Power subsystem, Telemetry Tracking and Control (TT & C) system, Power Supply subsystem, Attitude Control, Spinning satellite stabilization, Momentum wheel stabilization, Thermal control, Main and auxiliary propulsion subsystem, Transponders:-Single, double conversion and regenerative type, wideband receiver, input demultiplexer, power amplifier 5.2 Equivalent Isotropic Radiated Power (EIRP), Transmission Losses : Free-space transmission loss, Feeder losses, Antenna misalignment losses, Fixed atmospheric and ionosphere losses, PC- PC communication using Satellite Link, rain attenuation 5.3 Link-Power Budget, System Noise, Carrier-to-Noise Ratio, Combined Uplink and Downlink C/N Ratio, Reliability in satellite System 5.4 Satellite Applications: GPS, VSAT, Meteorology applications.	Lecture Using Chalk-Board Video Demonstrations Flipped Classroom Presentations Hands-on Case Study Site/Industry Visit

VI. LABORATORY LEARNING OUTCOME AND ALIGNED PRACTICAL / TUTORIAL EXPERIENCES.

Practical / Tutorial / Laboratory Learning Outcome (LLO)	Sr No	Laboratory Experiment / Practical Titles / Tutorial Titles	Number of hrs.	Relevant COs
LLO 1.1 Identify optical components, cables.	1	* Identification of optical components and cables.	2	CO1
LLO 2.1 Identify core, cladding, and coating of optical fiber.	2	Identification of core, cladding and coating of optical fiber cable.	2	CO1
LLO 3.1 Measure numerical aperture of optical fiber to find the refractive index.	3	* Find numerical aperture of optical fiber.	2	CO1

Practical / Tutorial / Laboratory Learning Outcome (LLO)	Sr No	Laboratory Experiment / Practical Titles / Tutorial Titles	Number of hrs.	Relevant COs
LLO 4.1 Test the performance of an Avalanche Photodiode (APD).	4	* Test the performance of an Avalanche Photodiode (APD) (Virtual lab can be used in case of non- availability of instruments in the lab)	2	CO2
LLO 5.1 Evaluate the Performance of the given photodiode (detector) using LED as an Optical Source	5	* Analysis of Photodiode Characteristics (Virtual lab can be used in case of non-availability of instruments in the lab)	2	CO2
LLO 6.1 Test the performance of the given photo-diode (Detector) using LASER as an optical source	6	* Measurement of light intensity and photocurrent at various positions for a given photodiode	2	CO2
LLO 7.1 Measure bit error rate (BER) at the optical receiver.	7	Find the bit error rate (BER) at the optical channel receiver.	2	CO2
LLO 8.1 Measure various parameters of the observed eye pattern.	8	* Measurement of various parameters of eye pattern.	2	CO2
LLO 9.1 Measure the power and find the attenuation loss in the given length of optical fiber cable.	9	Measurement of attenuation loss in optical fiber.	2	CO3
LLO 10.1 Measure the bending loss in optical fiber.	10	* Measurement of bending loss of given optical fiber cable.	2	CO3
LLO 11.1 Measure optical power using optical meter.	11	Measurement of optical power using optical meter	1	CO3
LLO 12.1 Calculate the Link Power Budget as per equation.	12	* Computation of Link Power Budget for Fiber Optics Using Coding (Use open source simulation software).	2	CO3
LLO 13.1 Determine the rise time budget.	13	* Computation of rise time budget w.r.t fiber optics through coding (Use open source simulation software).	2	CO3
LLO 14.1 Test satellite link operations.	14	* Establishing an Active satellite link and demonstrating link failure operations	2	CO4
LLO 15.1 Create a direct communication link between the Uplink Transmitter and Downlink Receiver using a tone signal .	15	Establish a direct communication link between the Uplink Transmitter and the Downlink Receiver using a tone signal.	2	CO4
LLO 16.1 Establish audio video satellite link between transmitter and receiver	16	Establishing audio video satellite link between transmitter and receiver	2	CO4
LLO 17.1 Establish a link to transmit and receive three separate signals (Audio, Video, Tone).	17	Simultaneous Transmission and Reception of Audio, Video, and Tone/Voice Signals via Satellite Link	2	CO4
LLO 18.1 Test the performance of satellite link by sending telecommand and receive the telemetry Data	18	Evaluating satellite link performance by transmitting telecommands and receiving telemetry data.	2	CO4
LLO 19.1 Interpret the result of the satellite link signal using function generator.	19	Transmission and reception of function generator waveforms through satellite communication link.	2	CO4

Practical / Tutorial / Laboratory Learning Outcome (LLO)	Sr No	Laboratory Experiment / Practical Titles / Tutorial Titles	Number of hrs.	Relevant COs
LLO 20.1 Estimate satellite Look Angles (Azimuth & Elevation) through coding.	20	* Calculation of Satellite Look Angles (Azimuth & Elevation) Using Coding (Use open source simulation software).	2	CO4
LLO 21.1 Verify Kepler's laws of motion	21	Simulating and validating Kepler's laws of planetary motion using code.(Use any relevant open source software).	2	CO4
LLO 22.1 Estimate Satellite Eclipse Periods	22	Simulation of Satellite Eclipse Periods through coding.(Use open source simulation software).	2	CO4
LLO 23.1 Measure carrier-to-noise ratio (C/N) of established satellite link.	23	* Measurement of the carrier-to-noise ratio (C/N) of the established satellite link.	2	CO5
LLO 24.1 Use RS 232 ports to set up a PC-PC satellite communication link	24	* Establish a direct communication link between two PCs using RS-232 serial ports.	2	CO5
LLO 25.1 Estimate rain attenuation through simulation.	25	* Find rain attenuation through coding (Use open source simulation software).	2	CO5
LLO 26.1 Investigate satellite link budget.	26	* Simulation of satellite link budget through coding (Use open source simulation software).	2	CO5
LLO 27.1 Test the reliability of satellite system.	27	Analysis of reliability in satellite system.	2	CO5
LLO 28.1 Calculate EIRP of any given satellite communication link.	28	* Find EIRP or any given satellite communication link through coding.(Use open source simulation software).	2	CO5
Note : Out of above suggestive LLOs - • '*' Marked Practicals (LLOs) Are mandatory. • Minimum 80% of above list of lab experiment are to be performed. • Judicial mix of LLOs are to be performed to achieve desired outcomes.				

VII. SUGGESTED MICRO PROJECT / ASSIGNMENT/ ACTIVITIES FOR SPECIFIC LEARNING / SKILLS DEVELOPMENT (SELF LEARNING)

Assignment

- The orbit of an earth orbiting satellite has an eccentricity of 0.15 and a semimajor axis 9000 km, determine the apogee. [Assume the earth's radius as 6371 km].
- A fiber has a core diameter of 2 micro meter and its core refractive index is 1.43. The refractive index of cladding is 1.415. Determine : (i) numerical aperture (ii) critical angle (iii) Acceptance angle (iv) Relative refractive index difference.

Student Activities

- Prepare a survey report to compare the technical specifications of different types of optical sources and detectors.
- Prepare a report on splicing techniques used in industry or telecom service providers.
- Prepare the chart to indicate applications of various satellite frequency bands (L,S,C,X,Ku,Ka band).
- Conduct an Internet survey and prepare a detailed report on GPS and its applications.

Visit

- Visit a facility where fiber optics are utilized for communication and various applications ,such as institute LAN, computer networking, remote sensing, the automotive industry, healthcare, decorations and lighting,

telecommunication, cable television, mechanical inspections and prepare a report.

- Visit a satellite center or pool lab equipped with a satellite setup and compile a detailed report on its components and their functions.

Micro project

- Build fiber optic lamp to demonstrate total internal reflection and light dispersion.
- Develop a GPS-based speedometer.

Note :

- Above is just a suggestive list of microprojects and assignments; faculty must prepare their own bank of microprojects, assignments, and activities in a similar way.
- The faculty must allocate judicious mix of tasks, considering the weaknesses and / strengths of the student in acquiring the desired skills.
- If a microproject is assigned, it is expected to be completed as a group activity.
- SLA marks shall be awarded as per the continuous assessment record.
- For courses with no SLA component the list of suggestive microprojects / assignments/ activities are optional, faculty may encourage students to perform these tasks for enhanced learning experiences.
- If the course does not have associated SLA component, above suggestive listings is applicable to Tutorials and maybe considered for FA-PR evaluations.

VIII. LABORATORY EQUIPMENT / INSTRUMENTS / TOOLS / SOFTWARE REQUIRED

Sr.No	Equipment Name with Broad Specifications	Relevant LLO Number
1	Splicing,Cutting and trimming tool of plastic fiber optics cables	1,2,9,10,11
2	Fiber optic cleaning kit	1,2,9,10,11
3	Fiber optic cables	1,2,9,10,11
4	Fiber optic Trainer kit	1,3,7,8,9,10,11
5	Optical fiber power meter	11
6	Desktop computer/Laptop,List of software:MATLAB,SCILAB or any other open source software	12,13,20,21,22,25,26,27,28
7	Spectrum Analyzer-frequency range-2.4 to 2.495 GHzResolution-26 KHz to 3 MHz,resolution BW-58.036 to 812.500 KHz	14,15,16,17,18,19,23
8	Satellite Trainer Kit (ST2272)/(STC 24):Uplinking frequency 2414/2432/2450/2468 MHz,4 MHz clock frequency,PIC16F84-8 bit RISC processor based PLL,16 MHz Bandwidth,FM Modulation of Audio and Video 5/5.5/8 MHz Audio and Video Modulation,Detachable Dish Antenna,Radiated Power output 25mW (approx.),4 downlink frequencies 2414/2432/2450/2468 MHz	14,15,16,17,18,19,23
9	RF Signal Generator,9 KHz to 3 GHz,Output Power @ 1 GHz,-127 dBm to +13 dBm AM,FM,PM Analog I/Q Input Pulse,Frequency Modulation-Maximum Deviation @ 1 GHz,20 Hz to 100 KHz	19
10	PC-Processor-dual core @ 2.4 GHz(i5 or i7 Intel processor or equivalent AMD),RAM-4GB,Hard Drive-320 GB 5400 RPM hard drive,OS-win 7/10	24
11	DMM:DC,0-1.5/3 Amp,0-2.5/5 Amp,0-5/10 Amp,0-150/300V,0-250/500V,0-75/150VAC-0-1000V,0-10A	4,5,6
12	Fiber optic cable Tester	4,5,6
13	Lux meter:Display:3 1/2 digit 18mm (0.7")/LCDRanges:1 to 50,000 LUX/Over -input:indication of	4,5,6

Sr.No	Equipment Name with Broad Specifications	Relevant LLO Number
14	Power Supply Type:DC,0-30 V, 0-3 A	4,5,6,9,10,11
15	OTDR-Attenuation resolution -0.001BdB,Attenuation measurement linearity 0.05 dB ,Distance measurement accuracy +/- (0.5 + resolution + 5 X 10 ⁻⁵ X L) m	9
16	CRO/Digital storage oscilloscope:60 MHz/100 MHz/200 MHz bandwidth,500MS/s to 1 GS/s real -time sample rate,50 GS/s sample rate for repetitive waveforms,High resolution color LCD display	9,10

IX. SUGGESTED WEIGHTAGE TO LEARNING EFFORTS & ASSESSMENT PURPOSE (Specification Table)

Sr.No	Unit	Unit Title	Aligned COs	Learning Hours	R-Level	U-Level	A-Level	Total Marks
1	I	Basics of Optical fiber communication	CO1	10	2	4	6	12
2	II	Optical Communication Systems	CO2	10	2	6	6	14
3	III	Characteristics of Optical Fiber	CO3	15	4	6	6	16
4	IV	Overview of Satellite Systems	CO4	10	2	4	6	12
5	V	Satellite space segment and space link	CO5	15	2	6	8	16
Grand Total				60	12	26	32	70

X. ASSESSMENT METHODOLOGIES/TOOLS

Formative assessment (Assessment for Learning)

- Two offline unit tests of 30 marks and average of two unit test marks will be considered for out of 30 marks.

Summative Assessment (Assessment of Learning)

- End semester assessment of 70 marks. End semester summative assessment of 25 marks for laboratory learning.

XI. SUGGESTED COS - POS MATRIX FORM

Course Outcomes (COs)	Programme Outcomes (POs)							Programme Specific Outcomes* (PSOs)		
	PO-1 Basic and Discipline Specific Knowledge	PO-2 Problem Analysis	PO-3 Design/ Development of Solutions	PO-4 Engineering Tools	PO-5 Engineering Practices for Society, Sustainability and Environment	PO-6 Project Management	PO-7 Life Long Learning	PSO-1	PSO-2	PSO-3
CO1	3	1	2	3	2	2	3			
CO2	3	2	2	3	2	2	1

Note : Teachers are requested to check the creative common license status/financial implications of the suggested online educational resources before use by the students		

Programme Name/s : Electronics & Tele-communication Engg./ Electrical and Electronics Engineering/
 Electronics & Communication Engg./ Electronics Engineering/
Programme Code : EJ/ EK/ ET/ EX
Semester : Sixth
Course Title : AUTOMATION & PLC
Course Code : 316334

I. RATIONALE

Automation revolutionizes manufacturing by enhancing quality, flexibility, and safety while optimizing costs. To stay ahead, industries are rapidly adopting advanced automation technologies. This course equips learners with the expertise to develop, maintain, and operate sophisticated automation systems, leveraging PLC technology to control diverse industrial processes efficiently.

II. INDUSTRY / EMPLOYER EXPECTED OUTCOME

The aim of this course is to attain the following industry/employer expected outcome through various teaching learning experiences: "Maintain Automation systems."

III. COURSE LEVEL LEARNING OUTCOMES (COS)

Students will be able to achieve & demonstrate the following COs on completion of course based learning

- CO1 - Identify different components of automation system.
- CO2 - Interface the given I/O device with PLC module.
- CO3 - Develop ladder logic program for various logic gates and Boolean equations.
- CO4 - Develop ladder logic program for given application.
- CO5 - Use the relevant communication protocol for specific automation system.

IV. TEACHING-LEARNING & ASSESSMENT SCHEME

Course Code	Course Title	Abbr	Course Category/s	Learning Scheme						Credits	Assessment Scheme											
				Actual Contact Hrs./Week			SLH	NLH	Paper Duration		Theory				Based on LL & TL				Based on SL		Total Marks	
															Practical							
				CL	TL	LL	FA-TH	SA-TH			Total		FA-PR		SA-PR		SLA					
													Max	Min	Max	Min	Max	Min	Max	Min

Total IKS Hrs for Sem. : 0 Hrs

Abbreviations: CL- ClassRoom Learning , TL- Tutorial Learning, LL-Laboratory Learning, SLH-Self Learning Hours, NLH-Notional Learning Hours, FA - Formative Assessment, SA -Summative assessment, IKS - Indian Knowledge System, SLA - Self Learning Assessment

Legends: @ Internal Assessment, # External Assessment, *# On Line Examination , @\$ Internal Online Examination

Note :

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.* 15 Weeks
5. 1 credit is equivalent to 30 Notional hrs.
6. * Self learning hours shall not be reflected in the Time Table.
7. * Self learning includes micro project / assignment / other activities.

V. THEORY LEARNING OUTCOMES AND ALIGNED COURSE CONTENT

Sr.No	Theory Learning Outcomes (TLO's) aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.
1	TLO 1.1 Describe the benefits of Automation TLO 1.2 Describe the function of components of automation system. TLO 1.3 Compare fixed and modular automation. TLO 1.4 Enlist application areas of automation System. TLO 1.5 Compare tools of Automation System.	Unit - I Basics of Automation 1.1 Automation: Features and benefits. 1.2 Hierarchy of automation systems (five layer automation) 1.3 Types of automation system: Fixed, Modular. 1.4 Application areas of automation system. 1.5 Introduction of Automation tools : PLC,HMI, SCADA, DCS, Hybrid Control System (Function and brief introduction)	Lecture Using Chalk-Board Educational Videos Presentations Case Study Site/Industry Visit

Sr.No	Theory Learning Outcomes (TLO's) aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.
2	TLO 2.1 Draw block diagram of PLC and explain functions of each block. TLO 2.2 Describe operating modes of CPU. TLO 2.3 Explain redundancy concept in PLC with neat diagram. TLO 2.4 Classify modular PLC. TLO 2.5 Select the appropriate I/O module for specific application and illustrate the wiring diagram for interfacing field I/O devices with the PLC. TLO 2.6 Explain the sinking and sourcing concept of PLC input output module with neat sketches.	Unit - II PLC Fundamentals and Interfacing 2.1 Architecture of PLC: Block diagram, function of each block. 2.2 CPU : Function, Scanning cycle, speed of execution, operating modes of CPU (Programming, RUN / STOP Mode), Memory organization of PLC 2.3 Redundancy in PLC system. 2.4 Types of PLC- Based on connection (fixed, modular) , based on size (small, medium, large) , advantages of PLC system over relay based system. 2.5 I/O Modules: Types(Discrete and Analog), Discrete I/O module: Block diagram, function of each block, Specifications, wiring of I/O devices with PLC . Analog I/O module: Block diagram, function of each block, Specifications, wiring of I/O devices with PLC Comparison of AC and DC Discrete PLC Module(Voltage level, speed, noise immunity applications, common output type and safety) 2.6 Sinking and sourcing concept of I/O modules, selection criteria of PLC.	Lecture Using Chalk-Board Educational Videos Presentations Collaborative learning Flipped Classroom
3	TLO 3.1 Compare PLC programming languages. TLO 3.2 Describe significance of various parts of ladder diagram. TLO 3.3 Specify the proper I/O addressing format for PLC. TLO 3.4 Develop ladder program to test logic gates and boolean equations. TLO 3.5 Develop ladder logic for given process using relay instructions . TLO 3.6 Draw and explain Analog scaling instruction used in PLC .	Unit - III Basic PLC Programming 3.1 PLC programming languages: Ladder Diagram Programming, Functional Block diagram, Sequential function chart, Structured text, Instruction list (Introduction and features). 3.2 Ladder logic basics: Structure of ladder logic(Power rails, Rungs, Inputs, Outputs, address notation and tag names) 3.3 Ladder programming instructions: Relay based instructions (NO Contact, NC Contact, Output coil, Set output coil, Reset output coil) , bit set /reset instructions: symbols and working. 3.4 PLC I/O Addressing. 3.5 Ladder logic programs for various logic gates and boolean expressions. 3.6 Ladder logic program examples based on bit/relay instruction.(ON/OFF control ,automatic door opening and closing, sequencing operation ,latching/unlatching) 3.7 Analog signal processing Instruction(Scaling and Normalization)	Lecture Using Chalk-Board Educational Videos Demonstration Presentations Case Study Collaborative learning

Sr.No	Theory Learning Outcomes (TLO's) aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.
4	TLO 4.1 Use appropriate timer instruction to develop ladder program for the given application. TLO 4.2 Use appropriate counter instruction to develop ladder program for the given application. TLO 4.3 Use Logical, Comparison, Data handling instructions to develop ladder program for given application. TLO 4.4 Develop ladder program for the given industrial application. TLO 4.5 Develop PLC sequential function chart for the given industrial application.	Unit - IV Advanced PLC Programming 4.1 Timer instruction : ON delay, OFF delay ,Retentive, (Symbol, Status bits, Control word format, timing diagram, working). 4.2 Counter Instruction: Up, Down, Up/Down (symbol, control word format and timing diagram, working). 4.3 Logical, Comparison, arithmetic(mathematical), and Data Handling instructions. 4.4 Ladder logic for industrial application: Automatic Tank Level Control, Sequential motor control, Automatic Bottle filling plant ,Process control, Automatic Car parking, Automatic Traffic light control, Home automation, Objects counter (System design, I/O Listing, Ladder logic) 4.5 Sequential function chart (SFC) programming : Introduction, Structure of SFC, Transition representation ,Types of SFC: (Selection branch ,Simultaneous branch), Sequential functional chart design for object sorting, pick up and place.	Lecture Using Chalk-Board Educational Video Demonstration Presentations Case Study Site/Industry Visit Collaborative learning
5	TLO 5.1 Describe SCADA system architecture in automation system. TLO 5.2 Describe communication protocols used for automation system. TLO 5.3 State benefits of AI in PLC systems. TLO 5.4 Describe steps to share data from PLC to cloud.	Unit - V Basics of Communication protocols, SCADA and Advancements in PLC 5.1 Supervisory Control and Data Acquisition (SCADA)- Basic function, Generalized block diagram, function of each block, Interfacing of SCADA with PLC, applications of SCADA. 5.2 Basic communication protocols used in industrial automation: Types of Communication interface , Protocols: PROFINET , MODBUS (RTU and TCP/IP), Profibus DP, Ethernet / IP. Foundation Field Bus, HART (wire and Wireless) 5.3 AI Tools for PLC programming: Introduction ,Benefits ,Applications ,Challenges of AI in PLC systems. 5.4 Cloud PLC: Introduction ,cloud-PLC interconnection , Benefits ,Steps to send data from PLC to cloud.	Lecture Using Chalk-Board Presentations Educational Video Collaborative learning

VI. LABORATORY LEARNING OUTCOME AND ALIGNED PRACTICAL / TUTORIAL EXPERIENCES.

Practical / Tutorial / Laboratory Learning Outcome (LLO)	Sr No	Laboratory Experiment / Practical Titles / Tutorial Titles	Number of hrs.	Relevant COs
LLO 1.1 Identify the components of automation system available in laboratory.	1	*Identification of components of automation trainer kit available in the laboratory.	2	CO1
LLO 2.1 Interface input output devices with PLC and test the output for various inputs .	2	*Interface given I/O devices with PLC.	2	CO1 CO2

Practical / Tutorial / Laboratory Learning Outcome (LLO)	Sr No	Laboratory Experiment / Practical Titles / Tutorial Titles	Number of hrs.	Relevant COs
LLO 3.1 Interface input output devices with PLC and test the output for various inputs in virtual lab.	3	Interface I/O devices with PLC in virtual lab	2	CO1 CO2
LLO 4.1 Test sinking and sourcing concept in discrete I/O module.	4	Sourcing and sinking connection of I/O devices with discrete I/O module.	2	CO2
LLO 5.1 Test functionality of logic gates using ladder diagram.	5	*Test functionality of various logic gates using ladder diagram.	2	CO3
LLO 6.1 Design 4:1 multiplexer using ladder diagram.	6	*Develop ladder program for 4:1 Multiplexer.	2	CO3
LLO 7.1 Test relay type instructions(NO,NC,output coil etc) using ladder diagram.	7	* Test the functionality of latching using basic relay type instructions in ladder diagram.	2	CO3
LLO 8.1 Test ladder program for sequential ON-OFF control of lamps/ motors.	8	Develop a ladder program for sequential ON-OFF control of lamps/motors.	2	CO3
LLO 9.1 Test ladder program to monitor the temperature of a given liquid using RTD/Thermocouple and PLC (use Analog scaling instruction)	9	*Develop a ladder program to process analog signal.	2	CO3
LLO 10.1 Control the direction of stepper motor using ladder diagram.	10	Develop ladder program to control the direction (Clockwise and Anticlockwise)of stepper motor .	2	CO3 CO4
LLO 11.1 Test ladder program for automatic traffic control using virtual lab.	11	Develop ladder program for traffic light control system using virtual lab simulator	2	CO3 CO4
LLO 12.1 Test ladder program to identify metallic and non-metallic objects.	12	Develop ladder program to sort metallic and non-metalic objects .	2	CO3 CO4
LLO 13.1 Test SFC to identify metallic and non-metallic objects.	13	Develop Sequential Function Chart (SFC) to sort metallic and non-metalic objects .	2	CO3 CO4
LLO 14.1 Test ladder program for automatic car parking system.	14	*Develop ladder program for automatic car parking system.	2	CO3 CO4
LLO 15.1 Test and compare profibus and profinet network protocol .	15	Interface and test PLC with profibus and profinet network protocol.	2	CO5
LLO 16.1 Develop SCADA graphic screen integrate it with PLC to perform the sequential ON-OFF control of Lamps/motors.	16	*Develop SCADA graphic screen and integrate with PLC to perform the sequential ON-OFF control of Lamps/motors.	2	CO5

Note : Out of above suggestive LLOs -

- '*' Marked Practicals (LLOs) Are mandatory.
- Minimum 80% of above list of lab experiment are to be performed.
- Judicial mix of LLOs are to be performed to achieve desired outcomes.

VII. SUGGESTED MICRO PROJECT / ASSIGNMENT/ ACTIVITIES FOR SPECIFIC LEARNING / SKILLS DEVELOPMENT (SELF LEARNING)

Assignment

- Prepare a report on analog I/O module and Digital I/O module.
- Give selection criteria's of I/O modules in automation system.

Industrial Visit

- Visit nearby PLC/SCADA/DCS based process / packaging industry, observe the industrial automation and prepare a report

Micro project

- Automatic Water Level Monitoring and Control
 - 1) Develop ladder program to monitor and maintain the water level in a tank.
 - 2) Prepare I/O list with tags.
 - 3) Draw wiring diagram.
 - 4) Describe Network protocol used
 - 5) SCADA Integration: Display real-time tank levels and control pump operations remotely
- Automatic bottle filling plant
 - 1) Develop ladder program to monitor and maintain the water level in a tank.
 - 2) Prepare I/O list with tags.
 - 3) Draw wiring diagram.
 - 4) Describe Network protocol used
 - 5) SCADA Integration: Display real-time process of automatic bottle filling plant

Note :

- Above is just a suggestive list of microprojects and assignments; faculty must prepare their own bank of microprojects, assignments, and activities in a similar way.
- The faculty must allocate judicious mix of tasks, considering the weaknesses and / strengths of the student in acquiring the desired skills.
- If a microproject is assigned, it is expected to be completed as a group activity.
- SLA marks shall be awarded as per the continuous assessment record.
- For courses with no SLA component the list of suggestive microprojects / assignments/ activities are optional, faculty may encourage students to perform these tasks for enhanced learning experiences.
- If the course does not have associated SLA component, above suggestive listings is applicable to Tutorials and maybe considered for FA-PR evaluations.

VIII. LABORATORY EQUIPMENT / INSTRUMENTS / TOOLS / SOFTWARE REQUIRED

Sr.No	Equipment Name with Broad Specifications	Relevant LLO Number
1	Nano PLC, Mini PLC, Micro PLC with analog and Digital I/O, memory, peripheral interfaces, Profinet and Profibus network.	1,2,4,7,5,6,8,10,12,14,13,15,16
2	Input and Output devices for PLC: like Lamp, DC Motor, Proximity sensors, Thermocouple/RTD, Red, green, yellow LEDs, Stepper Motor, limit switches, push button.	1,2,4,7,5,6,8,10,12,14,13,15,16,9
3	Ladder logic simulator : Such as TIA portal/RS Logix/CODESYS/Pico soft Simulator/ EDA tools.	1,2,4,7,5,6,8,10,12,14,13,15,16,9
4	PLC with programming Software and interfacing hardware, user manual, (complete PLC Trainer system)	1,2,4,7,5,6,8,10,12,14,13,15,9

Sr.No	Equipment Name with Broad Specifications	Relevant LLO Number
5	SCADA software: Such as Wincc/Eclipse/Factory I/O/Wonder ware /InTouch/Visualization	16
6	Virtual lab simulator.	3,11

IX. SUGGESTED WEIGHTAGE TO LEARNING EFFORTS & ASSESSMENT PURPOSE (Specification Table)

Sr.No	Unit	Unit Title	Aligned COs	Learning Hours	R-Level	U-Level	A-Level	Total Marks
1	I	Basics of Automation	CO1	6	2	2	4	8
2	II	PLC Fundamentals and Interfacing	CO2	14	4	6	6	16
3	III	Basic PLC Programming	CO3	16	4	6	8	18
4	IV	Advanced PLC Programming	CO4	16	4	6	8	18
5	V	Basics of Communication protocols, SCADA and Advancements in PLC	CO5	8	2	4	4	10
Grand Total				60	16	24	30	70

X. ASSESSMENT METHODOLOGIES/TOOLS

Formative assessment (Assessment for Learning)

- For formative assessment of laboratory learning 25 marks. Each practical will be assessed considering 60% weightage to process, 40% weightage to product.
- Two offline unit tests are of 30 marks and average of two unit test marks will be consider for out of 30 marks.

Summative Assessment (Assessment of Learning)

- End semester assessment is of 70 marks.
- End semester summative assessment is of 25 marks for laboratory learning.

XI. SUGGESTED COS - POS MATRIX FORM

Course Outcomes (COs)	Programme Outcomes (POs)							Programme Specific Outcomes* (PSOs)		
	PO-1 Basic and Discipline Specific Knowledge	PO-2 Problem Analysis	PO-3 Design/ Development of Solutions	PO-4 Engineering Tools	PO-5 Engineering Practices for Society, Sustainability and Environment	PO-6 Project Management	PO-7 Life Long Learning	PSO-1	PSO-2	PSO-3
CO1	3	1	2	1	2	-	2			
CO2	3	1	2	1	2	1	2			
CO3	3	2	2	2	3	1	3			
CO4	2	3	3	3	3	1	3			
CO5	2	3	3	3	2	3	3			

Legends :- High:03, Medium:02,Low:01, No Mapping: -
*PSOs are to be formulated at institute level

XII. SUGGESTED LEARNING MATERIALS / BOOKS

Sr.No	Author	Title	Publisher with ISBN Number
1	John W. Webb & Ronald A. Reis	Programmable Logic Controllers- Principles and Applications	Fifth Edition, Pearson Education India.,Noida ISBN-13- 9789-33-255-512-9

Programme Code	: AO/ DE/ EJ/ ET/ EX/ IE/ TE
Semester	: Sixth
Course Title	: EMERGING TRENDS IN ELECTRONICS
Course Code	: 316337

I. RATIONALE

The rapid advancement in electronics is driven by innovations in computing, communication, automation technologies such as AI, ML, IoT, quantum computing. Modern manufacturing techniques, including surface mount technology and automated assembly improves production quality and sustainability. Next-generation telecom networks enable faster and more reliable data exchange. This course will help student to acquire knowledge in Emerging trends in electronics.

II. INDUSTRY / EMPLOYER EXPECTED OUTCOME

The aim of this course is to help students to attain the following industry/employer expected outcome through various teaching learning experiences: "Acquire knowledge of Emerging Trends in Electronics fields."

III. COURSE LEVEL LEARNING OUTCOMES (COS)

Students will be able to achieve & demonstrate the following COs on completion of course based learning

- CO1 - Select the appropriate processor for a specific type of application.
- CO2 - Suggest the relevant techniques in the electronic system manufacturing process.
- CO3 - Suggest a different telecom network for the given application.
- CO4 - Connect IoT Devices to cloud platforms for data storage and analysis.
- CO5 - Interpret drone component functions, government guidelines, and application areas.

IV. TEACHING-LEARNING & ASSESSMENT SCHEME

7. * Self learning includes micro project / assignment / other activities.

V. THEORY LEARNING OUTCOMES AND ALIGNED COURSE CONTENT

Sr.No	Theory Learning Outcomes (TLO's) aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.
1	TLO 1.1 Describe the architecture of given specific modern processors. TLO 1.2 Compare the salient features of ESP32 and ESP8266. TLO 1.3 Establish the relationship between Artificial Intelligence (AI), Machine Learning (ML) and Deep Learning (DL). TLO 1.4 Differentiate between Single Agent and Multi-Agent with examples. TLO 1.5 Compare classical computing with quantum computing with a suitable example.	Unit - I Advanced Processors and Technology 1.1 Graphical Processing Unit (GPU): Introduction, features, Overview of processor architecture, superscalar concept, advantages and applications 1.2 ESP 32: features, pin out, Interfacing board, Comparison with ESP 8266 and Arduino Uno, simple programs and applications 1.3 Artificial Intelligence/Machine Learning [AI/ML]: Definitions, applications and advantages of AI, Definition and Types of ML(Machine Learning) such as Supervised, Unsupervised and Reinforcement. Relationship between DL (Deep Learning), ML and AI. Agents in AI: Single Agent and Multi-Agent 1.4 Quantum Computing: Introduction, qubit (quantum bit), comparison of classical versus Quantum systems, Applications of Quantum Computing	Video Demonstrations Presentations Collaborative learning Flipped Classroom

Sr.No	Theory Learning Outcomes (TLO's) aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.
2	TLO 2.1 Compare SMD technology over traditional (through-hole components) technology in terms of size, performance, and manufacturing efficiency. TLO 2.2 Explain the Human-Machine Interface (HMI) concept in smart manufacturing. TLO 2.3 Analyze the role of robotics in smart manufacturing. TLO 2.4 Suggest modern machines of the given specifications for electronic system assembly and manufacturing. TLO 2.5 Evaluate the significance of environmental standards such as EPEAT and RoHS in electronic manufacturing and their impact on sustainability. TLO 2.6 Explain the concept of Open Source Assembly and Testing.	Unit - II Smart Manufacturing Processes and Tools 2.1 Surface Mount Technology (SMT): Introduction, characteristics, advantages, applications 2.2 HMI and Robotics in Smart Manufacturing Process : Introduction, functionality, types, benefits, Robotics in Smart Manufacturing: Functionality, benefits, types of Robots: Articulated Robots, Selective Compliance Articulated Robot Arm (SCARA), Autonomous Mobile Robots (AMRs), Cobots. 2.3 Modern Electronic Assembly and Manufacturing Process: Introduction, classification of machines used in electronic assembly, role, features, and specifications of different machines. Pick-and-Place Machine: Working principle and operation, specifications, Automatic Component Insertion Machine: Functionality and working mechanism, advantages over manual component placement. Reflow soldering Method : Overview of soldering techniques in PCB assembly, working principle, stages of the reflow soldering process (Preheating, Soaking, Reflow, Cooling) 2.4 Environmental standards for electronic manufacturing such as: Electronic Product Environmental Assessment Tool (EPEAT) and Restriction of Hazardous Substances (RoHS) standards 2.5 Introduction to Open Source Assembly and Testing (OSAT)	Video Demonstrations Presentations Site/Industry Visit Flipped Classroom

Sr.No	Theory Learning Outcomes (TLO's) aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.
3	TLO 3.1 Explain the function of the given network component. TLO 3.2 Interpret the spectrum used in the present Telecom sector. TLO 3.3 Compare the mobile generations. TLO 3.4 Explain the Multi Protocol Label Switching in NGN core. TLO 3.5 Analyze Fiber to the Home (FTTH) technology, its architecture, and components of Optical Line Termination (OLT) and Optical Network Unit (ONU). TLO 3.6 Assess the effect of Optical Transport Network(OTN) on data transmission.	Unit - III Next Generation Telecom Network 3.1 NGN architecture: Features, Functional block diagram, Network components: Media Gateway, Media Gateway Controller, and Application Server 3.2 NGN Wireless Technology: Telecom network Spectrum: Licensed and unlicensed radio bands, Mobile network evolution (3G to 5.5G) and comparative features 3.3 NGN Core: Concepts, features and advantages 3.4 Fiber to the Home (FTTH): Features, architecture and components: Optical Line Termination (OLT) ,Optical Network Unit (ONU) 3.5 Synchronous Digital Hierarchy (SDH), Optical Transport Network(OTN): Introduction, features and applications	Lecture Using Chalk-Board Presentations Video Demonstrations Site/Industry Visit Flipped Classroom
4	TLO 4.1 Describe different IoT architectures and their role in data processing. TLO 4.2 Compare different cloud service providers based on their capabilities and applications. TLO 4.3 Explain how IoT enhances efficiency and automation in different industrial sectors. TLO 4.4 Explain the applications and benefits of Industry 5.0 in smart manufacturing. TLO 4.5 Differentiate between Augmented Reality (AR), Virtual Reality (VR), and Mixed Reality (MR), along with their applications across various domains.	Unit - IV IIoT and Immersive Technologies 4.1 Internet of Things (IoT): Introduction, functions of Cyber physical system components, architectures, IoT sensor to cloud data routes 4.2 Introduction to Cloud computing, Cloud service providers (AWS, AZURE, GOOGLE Cloud, ThingSpeak), ThingSpeak: Features, collecting and retrieving data from ThingSpeak, applications 4.3 Applications of IoT in Industries: Automotive, Discrete Manufacturing, Telecom and Agro- industries 4.4 Industry 5.0 and Industrial IoT (IIoT): Introduction, evolution from I1.0 to I5.0, applications and benefits of I5.0, Compare I3.0, I4.0 and I5.0, Architecture of I5.0 4.5 Introduction to Immersive Technologies: Overview of Virtual reality (VR), Augmented Reality (AR), Mixed reality (MR) and Extended reality (XR)	Lecture Using Chalk-Board Hands-on Collaborative learning Flipped Classroom

Sr.No	Theory Learning Outcomes (TLO's) aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.
5	TLO 5.1 Classify drones based on structural configuration. TLO 5.2 Describe the functions of different drone components. TLO 5.3 Interpret relevant government drone regulations. TLO 5.4 Identify the utility of drones in the given application.	Unit - V Drone Systems and Applications 5.1 Overview of Drone Technologies, Types of Drones: Multi-Rotor, Single-Rotor, Fixed-Wing, Hybrid 5.2 Hardware Components of drones: Frame, Propellers, Motors, Electronic speed controller, Flight controllers, Gimbal, Radio transmitter and receiver, GPS, Camera, Power distribution panel, Landing gears, Sensors: accelerometer, gyroscope and magnetometers, Batteries: lithium polymer and lithium-ion 5.3 Regulations and safety considerations: Category of zones: Red zone, Inner yellow zone, Outer yellow zone, Green zone, DGCA rules and regulations for registration, operation and pilot license of drones 5.4 Drone Applications: Photography, Logistics, Medical, Agriculture, Defence, Surveillance, Disaster management	Presentations Video Demonstrations Model Demonstration Flipped Classroom

VI. LABORATORY LEARNING OUTCOME AND ALIGNED PRACTICAL / TUTORIAL EXPERIENCES : NOT APPLICABLE.

VII. SUGGESTED MICRO PROJECT / ASSIGNMENT/ ACTIVITIES FOR SPECIFIC LEARNING / SKILLS DEVELOPMENT (SELF LEARNING)

Micro project

- Develop a simple ESP32-based sensor data logging system and explain the interfacing process.
- Implement a basic IoT-based LED control program using ESP32 and document the code.
- Develop a smart home automation system using an ESP32 microcontroller, allowing users to control home appliances (lights, fans, etc.) via a smartphone using Wi-Fi and a web-based dashboard or mobile app.
- Collect temperature and humidity data using DHT11/DHT22 sensors and send it to an IoT platform like ThingSpeak.
- Use networking tools like Cisco Packet Tracer to simulate MPLS functionality.
- Detect gas leaks using an MQ-6 sensor and send alerts to users via SMS or an IoT platform.
- Use an ultrasonic sensor in dustbins to detect the garbage level and send notifications to the waste collection department.
- Assemble a simple quadcopter using a frame, motors, electronic speed controllers, and a flight controller.

Student Activity

- Prepare a report on Open Source Assembly and Testing (OSAT).
- Prepare a report on automatic electronic components assembly machine.
- Prepare a PowerPoint presentation on upcoming 5G technology.
- Prepare a report on quantum bits (qubits) and their role in quantum processing using diagrams.
- Prepare a PowerPoint presentation on various Government of India schemes related to drones.
- Prepare a report on the application area of different types of drones.
- Prepare a report on the eligibility criteria for Remote Pilot License and the DGCA approved Remote Pilot Training Organizations near your area.
- Create a PowerPoint presentation on GPU architecture and its role in AI and gaming applications.
- Prepare a PowerPoint presentation on the functions of various sensors and actuators used in drones.
- Prepare internet-based reports on real-world applications of AI and ML in different industries.

Assignment

- Compare the working of superscalar processors with real-world examples.
- Explore anti-drone technology.

Note :

- Above is just a suggestive list of microprojects and assignments; faculty must prepare their own bank of microprojects, assignments, and activities in a similar way.
- The faculty must allocate judicious mix of tasks, considering the weaknesses and / strengths of the student in acquiring the desired skills.
- If a microproject is assigned, it is expected to be completed as a group activity.
- SLA marks shall be awarded as per the continuous assessment record.
- For courses with no SLA component the list of suggestive microprojects / assignments/ activities are optional, faculty may encourage students to perform these tasks for enhanced learning experiences.
- If the course does not have associated SLA component, above suggestive listings is applicable to Tutorials and maybe considered for FA-PR evaluations.

VIII. LABORATORY EQUIPMENT / INSTRUMENTS / TOOLS / SOFTWARE REQUIRED : NOT APPLICABLE**IX. SUGGESTED WEIGHTAGE TO LEARNING EFFORTS & ASSESSMENT PURPOSE (Specification Table)**

Sr.No	Unit	Unit Title	Aligned COs	Learning Hours	R-Level	U-Level	A-Level	Total Marks

Programme Name/s : Digital Electronics/ Electronics & Tele-communication Engg./ Electronics & Communication Engg./ Electronics Engineering/ Industrial Electronics/ Electronics & Computer Engg.

Programme Code : DE/ EJ/ ET/ EX/ IE/ TE

Semester : Sixth

Course Title : COMPUTER NETWORK & DATA COMMUNICATION

Course Code : 316338

I. RATIONALE

Computer Networks and Data Communication is crucial for modern communication services, enabling efficient information exchange and collaboration across devices. Through this course students will be able to select, classify, install, troubleshoot and maintain various data communication networks. This course focuses on enhancing the practical skills such as configuring routers, Modem, Repeaters and switches. Troubleshooting using diagnostic tools and maintaining networks are emphasized. This course includes projects focused on troubleshooting, maintenance, and network security.

II. INDUSTRY / EMPLOYER EXPECTED OUTCOME

This course aims to help the student to attain the following industry-identified outcomes through various teaching-learning experiences:

Maintain and troubleshoot network devices

III. COURSE LEVEL LEARNING OUTCOMES (COS)

Students will be able to achieve & demonstrate the following COs on completion of course based learning

- CO1 - Implement relevant Network Topology
- CO2 - Select relevant network model and Transmission Media for data communication system
- CO3 - Troubleshoot transmission errors and flow control of the data in Data Link Layer
- CO4 - Maintain Network layer and Transport layer
- CO5 - Interpret functions of Application layer and Protocols associated with it

IV. TEACHING-LEARNING & ASSESSMENT SCHEME

Course Code	Course Title	Abbr	Course Category/s	Learning Scheme					Credits	Assessment Scheme												Total Marks	
				Actual Contact Hrs./Week	SLHNLH			Theory		Based on LL & TL				Based on SL									
										Practical													
										CL	TL	LL	FA-TH	SA-TH	Total		FA-PR		SA-PR		SLA

Total IKS Hrs for Sem. : 0 Hrs

Abbreviations: CL- ClassRoom Learning , TL- Tutorial Learning, LL-Laboratory Learning, SLH-Self Learning Hours, NLH-Notional Learning Hours, FA - Formative Assessment, SA -Summative assessment, IKS - Indian Knowledge System, SLA - Self Learning Assessment

Legends: @ Internal Assessment, # External Assessment, *# On Line Examination , @\$ Internal Online Examination
Note :

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.* 15 Weeks
5. 1 credit is equivalent to 30 Notional hrs.
6. * Self learning hours shall not be reflected in the Time Table.
7. * Self learning includes micro project / assignment / other activities.

V. THEORY LEARNING OUTCOMES AND ALIGNED COURSE CONTENT

Sr.No	Theory Learning Outcomes (TLO's) aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.
1	TLO 1.1 Describe the role of the given component in the process of data communication. TLO 1.2 State two advantages of computer networking. TLO 1.3 Explain Network devices with its functions in respective layers. TLO 1.4 Describe the given topology with suitable diagram. TLO 1.5 Classify networks based on the transmission technology, physical size and architecture.	Unit - I Fundamentals of Data Communication and Computer Network 1.1 Data communication system and its components: Message, Protocol, Transmitter, Medium, Receiver 1.2 Need of computer networks, Network criteria, applications, advantages of networking 1.3 Network devices: Repeater, Hub, Bridge, Switches , Router, Gateway, Modem, NIC, Media Converters 1.4 Network topologies: Mesh, Star, Bus, Tree, Ring and Hybrid topologies, Schematic diagram, working, advantages, disadvantages and applications 1.5 Network Classification: • Based on Transmission Technology: Point to-point, Multipoint, Broadcast • Based on physical size: PAN, BAN, LAN, MAN, WAN, VPN, WLAN • Based on Architecture: Peer to Peer, Client Server	Lecture Using Chalk-Board Collaborative learning Presentations Video Demonstrations Program development tools and simulators

Sr.No	Theory Learning Outcomes (TLO's) aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.
2	TLO 2.1 Describe the functions of the given layer of OSI reference model. TLO 2.2 Explain four level addressing used in TCP/IP model. TLO 2.3 Compare TCP/IP model and OSI reference model. TLO 2.4 Describe characteristics of the given type of guided transmission media. TLO 2.5 Explain with sketches the working of the given type of modem. TLO 2.6 Compare different Switching techniques.	Unit - II Network models and Physical layer 2.1 The OSI Model: Layered Architecture, Encapsulation Layers in OSI Model: Physical Layer, Data-Link Layer, Network Layer, Transport Layer, Session Layer, Presentation Layer, Application Layer, Functions of each layer 2.2 TCP/IP Protocol Suite: Architecture, Layers in TCP/IP Protocol Suite: Physical Layer, Data-Link Layer, Network Layer, Transport Layer, Application Layer, Functions of each layer 2.3 Introduction to Protocols used in Network model (Enlist names only) 2.4 Addressing in TCP/IP: Physical, Logical, Port and Specific Addresses 2.5 Transmission Media: Guided Media -Twisted pair (UTP, STP) cable, Coaxial cable, Fiber-optic cable Unguided Transmission Media: Radio Waves, Microwaves, Infrared 2.6 Modems : Null Modem, Broadband modem, DSL, ADSL, HDSL, VDSL(working, configuration and the wiring diagram) 2.7 Switching: Circuit-switching, Packet Switching, Datagram approach, Virtual Circuit approach	Lecture Using Chalk-Board Presentations Collaborative learning Video Demonstrations Program development tools and simulators
3	TLO 3.1 Describe Data Link Layer services. TLO 3.2 Describe the technique of the given error control method with examples. TLO 3.3 Generate the CRC code for the given data word. TLO 3.4 Construct the Hamming code for the given data. TLO 3.5 Explain with sketches the given type of flow control used in the data link layer. TLO 3.6 Compare characteristics of given type of data link layer Protocols. TLO 3.7 Select the appropriate protocol for error free transmission of given data.	Unit - III Data Link Layer 3.1 Data link layer: Flow and Error control 3.2 Error control: Types of errors-Single bit and Burst errors, Redundancy • Codeword Generation- CRC, Checksum, Hamming code • Error Detection- CRC, Checksum • Error Detection and Correction- Hamming code 3.3 Flow control: Framing, Flow and Error control Protocols: • Noiseless channel: Stop-and-Wait protocol • Noisy channels: Stop and Wait Automatic Repeat Request (ARQ) protocol 3.4 Sliding window protocol: • One Bit Sliding window protocol • Go-Back-N ARQ • Selective Repeat ARQ 3.5 Point to Point Protocol(PPP): Framing and Transition phases of PPP	Lecture Using Chalk-Board Video Demonstrations Collaborative learning Presentations

Sr.No	Theory Learning Outcomes (TLO's) aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.
4	TLO 4.1 Select appropriate class for the given network size. TLO 4.2 Differentiate between classful and classless addressing with suitable example. TLO 4.3 Explain the role of NAT in address depletion. TLO 4.4 Describe transport layer services. TLO 4.5 Describe the given type of network security technique. TLO 4.6 Explain functions of firewall.	Unit - IV Network layer and Transport layer 4.1 Network layer Logical addressing: - IPv4 Addresses: Address space notations, Classful addressing and Classless addressing, Subnetting, Network Address Translation (NAT) - IPv6 addresses: Need for IPv6, Address space 4.2 Network layer-Multicast Routing Protocols :Unicast, Multicast and Broadcast routing and applications 4.3 Transport Layer: Process to Process delivery, TCP, UDP - Port: Addressing, Format, Operation and uses 4.4 Network security: Cryptography, Components of cryptography, Block diagram of symmetric and asymmetric cryptography 4.5 Security services: Firewalls, Types of Firewall, Packet-Filter Firewall and Proxy Firewall	Lecture Using Chalk-Board Presentations Video Demonstrations Presentations Program development tools and simulators
5	TLO 5.1 Describe functioning of DNS in internet. TLO 5.2 Explain how the working of Simple Mail Transfer Protocol is used for data transfer. TLO 5.3 Describe the importance of Message Access Agent for addressing. TLO 5.4 Explain the steps to transfer files using FTP. TLO 5.5 Explain the working of Telnet for remote logging.	Unit - V Application Layer 5.1 Application Layer Protocols: Domain Name System (DNS) architecture, Domain types, DNS name space, Domain name resolution & Mapping to physical addresses 5.2 Electronic Mail - Message Transfer Agent -Simple Mail Transfer Protocol (SMTP) Components, working - Message Access Agent - Post Office Protocol (POP) and Internet Message Access Protocol (IMAP), working 5.3 File Transfer Protocol (FTP), Anonymous FTP 5.4 Remote logging: Telnet	Lecture Using Chalk-Board Presentations Collaborative learning Video Demonstrations Program development tools and simulators

VI. LABORATORY LEARNING OUTCOME AND ALIGNED PRACTICAL / TUTORIAL EXPERIENCES.

Practical / Tutorial / Laboratory Learning Outcome (LLO)	Sr No	Laboratory Experiment / Practical Titles / Tutorial Titles	Number of hrs.	Relevant COs
LLO 1.1 Install packet tracer tools and workspaces. LLO 1.2 Place and connect network devices (PCs, switches and routers).	1	*Installation and introduction of Cisco Packet Tracer	2	CO1
LLO 2.1 Install GNS3 software simulator tools. LLO 2.2 Place and connect network devices (PCs, switches, routers).	2	Installation and introduction GNS3 software simulator tools	2	CO1
LLO 3.1 Analyse the type of network topology used in your lab.	3	Identify the topology used in the computer lab	2	CO1
LLO 4.1 Connect computers in Mesh topology and test the performance.	4	*Simulation of Mesh topology	2	CO1

Practical / Tutorial / Laboratory Learning Outcome (LLO)	Sr No	Laboratory Experiment / Practical Titles / Tutorial Titles	Number of hrs.	Relevant COs
LLO 5.1 Connect computers in Star topology and test the performance.	5	*Simulation of Star topology	2	CO1
LLO 6.1 Connect computers in Tree topology and test the performance.	6	Simulation of Tree topology	2	CO1
LLO 7.1 Install/configure/Test Peer to Peer LAN and sharing of resources.	7	*Share resources in a computer network	2	CO1
LLO 8.1 Set up a basic VPN and Connect remote clients securely using OpenVPN or Windows VPN.	8	Configuring VPN (Virtual Private Network) using simulator	2	CO1
LLO 9.1 Install and test Repeater and Bridge.	9	Installation of Repeater and Bridge	2	CO1
LLO 10.1 Execute TCP/IP network commands: ipconfig, ping, tracert.	10	*Troubleshoot computer network using given commands	2	CO2
LLO 11.1 Execute TCP/IP network commands: route, netstat, pathping.	11	*Troubleshoot computer network using given commands	2	CO2
LLO 12.1 Prepare a straight patch cord cable to connect the devices in the LAN.	12	*Prepare a standard network straight cable by using crimping tool	2	CO2
LLO 13.1 Prepare cross-connection cables to connect the devices in the LAN.	13	*Create cross-over network straight cable by using crimping tool	2	CO2
LLO 14.1 Capture Protocol Data Unit information of the TCP/IP and OSI Model using network simulator.	14	*Use PDU tool to analyse layers of OSI Model	2	CO2
LLO 15.1 Develop and test 'C' program for error detection using Hamming code.	15	Implementation of the Hamming code using c programming language to detect error	2	CO3
LLO 16.1 Develop and test 'C' program for error correction using Hamming code.	16	*Implementation of Hamming code using c programming language to correct error	2	CO3
LLO 17.1 Write a 'C' program for Cyclic Redundancy Check (CRC).	17	Implement C Program for CRC	2	CO3
LLO 18.1 Configure PPP (Point to Point Protocol) on Cisco packet tracer.	18	*Use PPP Protocol to establish a direct connection between two PCs	2	CO3
LLO 19.1 Capture TCP and UDP packet using CISCO Packet Tracer.	19	Measure types of transmission delays using CISCO Packet Tracer	2	CO4
LLO 20.1 Install and test Modem and Router.	20	Installation of Modem and Router	2	CO4
LLO 21.1 Create IPv6 environment in a small network using simulator.	21	Implement IPv6 addressing scheme on a network	2	CO4
LLO 22.1 Implement Classful Address in a for class A, Class B, Class C network node in CISCO packet tracer.	22	*Implement IP addresses for intranet in Class A, Class B, Class C	2	CO4
LLO 23.1 Configure basic firewall using Windows/Linux.	23	Configuration & Testing of basic Firewall	2	CO5
LLO 24.1 Create FTP Server using network simulation software.	24	*Use the FTP protocol to transfer files from one system to another system.	2	CO5
LLO 25.1 Block/unblock specific ports and test using TELNET.	25	*Use of Packet tracer as packet sniffer	2	CO5

Practical / Tutorial / Laboratory Learning Outcome (LLO)	Sr No	Laboratory Experiment / Practical Titles / Tutorial Titles	Number of hrs.	Relevant COs
LLO 26.1 Implement SMTP protocol using CISCO packet tracer.	26	*Implementation of SMTP protocol using CISCO packet tracer	2	CO5
LLO 27.1 Capture ARP and ICMP packet Traffic using packet tracer or any similar network simulation software.	27	Filter ARP and ICMP packets Traffic using network simulation software	2	CO5
LLO 28.1 Configure a POP3 protocol in Packet Tracer and Test domain.	28	Configuration of POP3 protocol using CISCO Packet Tracer	2	CO5
LLO 29.1 Configure a web server and access the website using a client PC using CISCO Packet tracer.	29	Configuration of a Web Server (HTTP/HTTPS) using CISCO Packet tracer	2	CO5
LLO 30.1 Configure a DNS server in Packet Tracer and Test domain.	30	*Configuration DNS Server using CISCO Packet Tracer	2	CO5

Note : Out of above suggestive LLOs -

- '*' Marked Practicals (LLOs) Are mandatory.
- Minimum 80% of above list of lab experiment are to be performed.
- Judicial mix of LLOs are to be performed to achieve desired outcomes.

VII. SUGGESTED MICRO PROJECT / ASSIGNMENT/ ACTIVITIES FOR SPECIFIC LEARNING / SKILLS DEVELOPMENT (SELF LEARNING)**Micro project**

- Simulation of Data Transmission: Use a network simulator (Cisco Packet Tracer or NS3) to visualize how data packets travel between devices.
- IP Addressing and Subnetting Calculator – Develop a tool that calculates subnet masks, IP ranges, and broadcast addresses for given IPs.
- Wireless Packet Capturing – Use Wireshark to capture and analyze Wi-Fi packets
- Designing a Basic VPN Network Configure a VPN connection between two remote locations. Secure the connection using encryption techniques.
- Install and configure NIC and find MAC Address of Device
- Design a network using any topology and do fault identification
- Network Topology Design – Create different hybrid network topologies using Packet Tracer.

Assignment

- For a trading firm, an organization with 10 users, draw network architecture design of wireless LAN.
- In a particular data transmission system, the data 4 received was 1011010 using 7 bit odd parity hamming code, determine the correct code
- Identify appropriate network topology and network connecting devices for following requirement. Draw network design for proposed network. An organization having its office in a building of 5 floor. Each floor it needs 20 machines. There is one File server. Each floor has 2 print servers to facilitate printer capacity using Tree topology.

Industrial visit

- Industrial visit to BSNL, ISRO, CDAC

Note :

- Above is just a suggestive list of microprojects and assignments; faculty must prepare their own bank of microprojects, assignments, and activities in a similar way.
- The faculty must allocate judicious mix of tasks, considering the weaknesses and / strengths of the student in acquiring the desired skills.
- If a microproject is assigned, it is expected to be completed as a group activity.
- SLA marks shall be awarded as per the continuous assessment record.
- For courses with no SLA component the list of suggestive microprojects / assignments/ activities are optional, faculty may encourage students to perform these tasks for enhanced learning experiences.
- If the course does not have associated SLA component, above suggestive listings is applicable to Tutorials and maybe considered for FA-PR evaluations.

VIII. LABORATORY EQUIPMENT / INSTRUMENTS / TOOLS / SOFTWARE REQUIRED

Sr.No	Equipment Name with Broad Specifications	Relevant LLO Number
1	Network Tool Kit: Crimping Tool for RJ-45 connector, 3 in 1 modular crimping tool for RJ-45 UTP CAT-5/CAT-6 Networking Cable, LAN Cutter 8P/6P/4P All-in-One or similar, Cable Tester/LAN Tester (Specification: Network Cable Tester for LAN RJ-45/CAT5/CAT6 UTP Wire Test Tool or similar)	13,12
2	Network Accessories: RJ45 connector, UTP cable, various connectors, 1000Mbps NIC	13,12
3	Printer	7
4	Desktop Computer with basic configuration	All
5	UPS 6 KVA online	All
6	Ethernet Switch- 4/8/16/24/32	All
7	Router-256MB Memory storage capacity, compatible with Desktop and Laptop, Rack Mountable, Wireless Connectivity	All
8	Simulation Software: CISCO Packet Tracer, CORE Network Emulator, GNS3 or any other simulator	All
9	Antivirus Software (online protection with firewall securities)	All

IX. SUGGESTED WEIGHTAGE TO LEARNING EFFORTS & ASSESSMENT PURPOSE (Specification Table)

Sr.No	Unit	Unit Title	Aligned COs	Learning Hours	R-Level	U-Level	A-Level	Total Marks
1	I	Fundamentals of Data Communication and Computer Network	CO1	12	4	4	6	14
2	II	Network models and Physical layer	CO2	14	4	4	6	14
